

**Product Notice**  
**CMC Part# 268010**

The manufacturer has advised that this unit was originally designed as a soldering gun. The supplied adapter allows its use for cutting web and rope. However, the practice of using a back and forth, sawing motion commonly used with box style rope cutters, will place stresses on the internal connectors that they were not originally designed for.

In order to maximize the service life of this product, let the heat of the blade do the majority of the work, using only light pressure against the rope or web. If you have any questions, please contact Customer Support at 800-235-5741.
